Abstracts must be submitted via the online CATALYST Submission Management System. Information about how to log into CATALYST, create a new account, and navigate through the submission process is available.

Call for Submissions | Geo-Congress

As of April 10, 2018, abstract submission is closed; no further submissions are possible. As of June 13, 2018, draft paper submission is closed; no further submissions are possible.

Call for Submissions | Geo-Congress

GBR Fundamentals Past Practices and Lessons Learned. Seminar on Geotechnical Baseline Reports . October 5, 2013 . Association of Geotechnical and . Geoenvironmental Specialists

GBR Fundamentals - AGS (HK)

OpenSeesPL is a PC-based graphical pre- and post-processor (user-interface) for three dimensional (3D) ground and ground-structure response. The 3D Finite Element (FE) computations are conducted using OpenSees developed by the Pacific Earthquake Engineering Research Center (PEER).

OpenSeesPL | 3D Lateral Pile-Ground Interaction

Geotechnical Engineering Journal of SEAGS: 2011-2015: From Editor in Chief: A. S. Balasubramaniam (Bala) Editor â€“ in - Chief of SEAGS-AGSSEA Journal B Sc, PhD (Cambridge) Formerly, Post-Doctorate Research Fellow, Royal Norwegian Council for

Shear Strength of Municipal Solid Waste | Edward

Many software programs are available for each discipline of civil engineering. Most civil engineers practice in specialized subsets of civil engineering, such as geotechnical engineering, structural engineering, transportation engineering, hydraulic engineering, environmental engineering, project and construction management and land surveying.

Civil engineering software - Wikipedia

Research interests. Chris Clayton's research, focusing on geotechnical site and material characterisation, has been largely application driven, and has been backed up by research and development using field monitoring (for example of tunnels and retaining structures), advanced laboratory testing and instrumentation, and by investigations into ...

Professor Chris Clayton | Engineering | University of

The standard penetration test (SPT) is an in-situ dynamic penetration test designed to provide information on the geotechnical engineering properties of soil.

Standard penetration test - Wikipedia

The subsoil formation at the site consists of a top fill layer of loamy sand containing little crushed stones and extending to a depth varying from 4.00 to 5.00 m below the ground surface.

Installation effects of auger cast-in-place piles

The small strain stiffness and the stiffness degradation curve of soils are required in advanced numerical analyses of geotechnical engineering problems.

Small strain stiffness and stiffness degradation curve of

Research Overview Jennifer Jacobs is a Professor in the Department of Civil Engineering at the University of New Hampshire. Dr. Jacobs received her Sc.B. in Electrical Engineering from Brown University in 1987, an M.S. from Tufts University in 1993, and her Ph.D. from Cornell University in 1997.
