Epidemiology: In children, 30 % of ependymomas appear before the age of 3 years and are more aggressive than in adults. Nearly 90 % of pediatric ependymomas are intra cranial : they occur in supratentorial or posterior fossa locations, and only 10 % are intraspinal.

Nervous system: Ependymomas

A big challenge facing community-based oncology practices as they transition to value-based reimbursement (VBR) models is wide and sometimes unnecessary variation in cancer treatment, which drives up cost without any additional clinical benefit to patients.
